

ZiP-CoVx-P2 Test (SARS-CoV-2)

ZiP Diagnostics is bringing a high sensitivity molecular test for SARS-CoV-2 to high volume production.

Advantages of this test include:

- Direct detection of SARS-CoV-2 virus
- Two gene targets for test result confirmation
- Takes throat and nasal swab samples
- Sample to result within 15-30 minutes
- Sensitivity comparable to PCR
- Low-cost test
- Room temperature storage

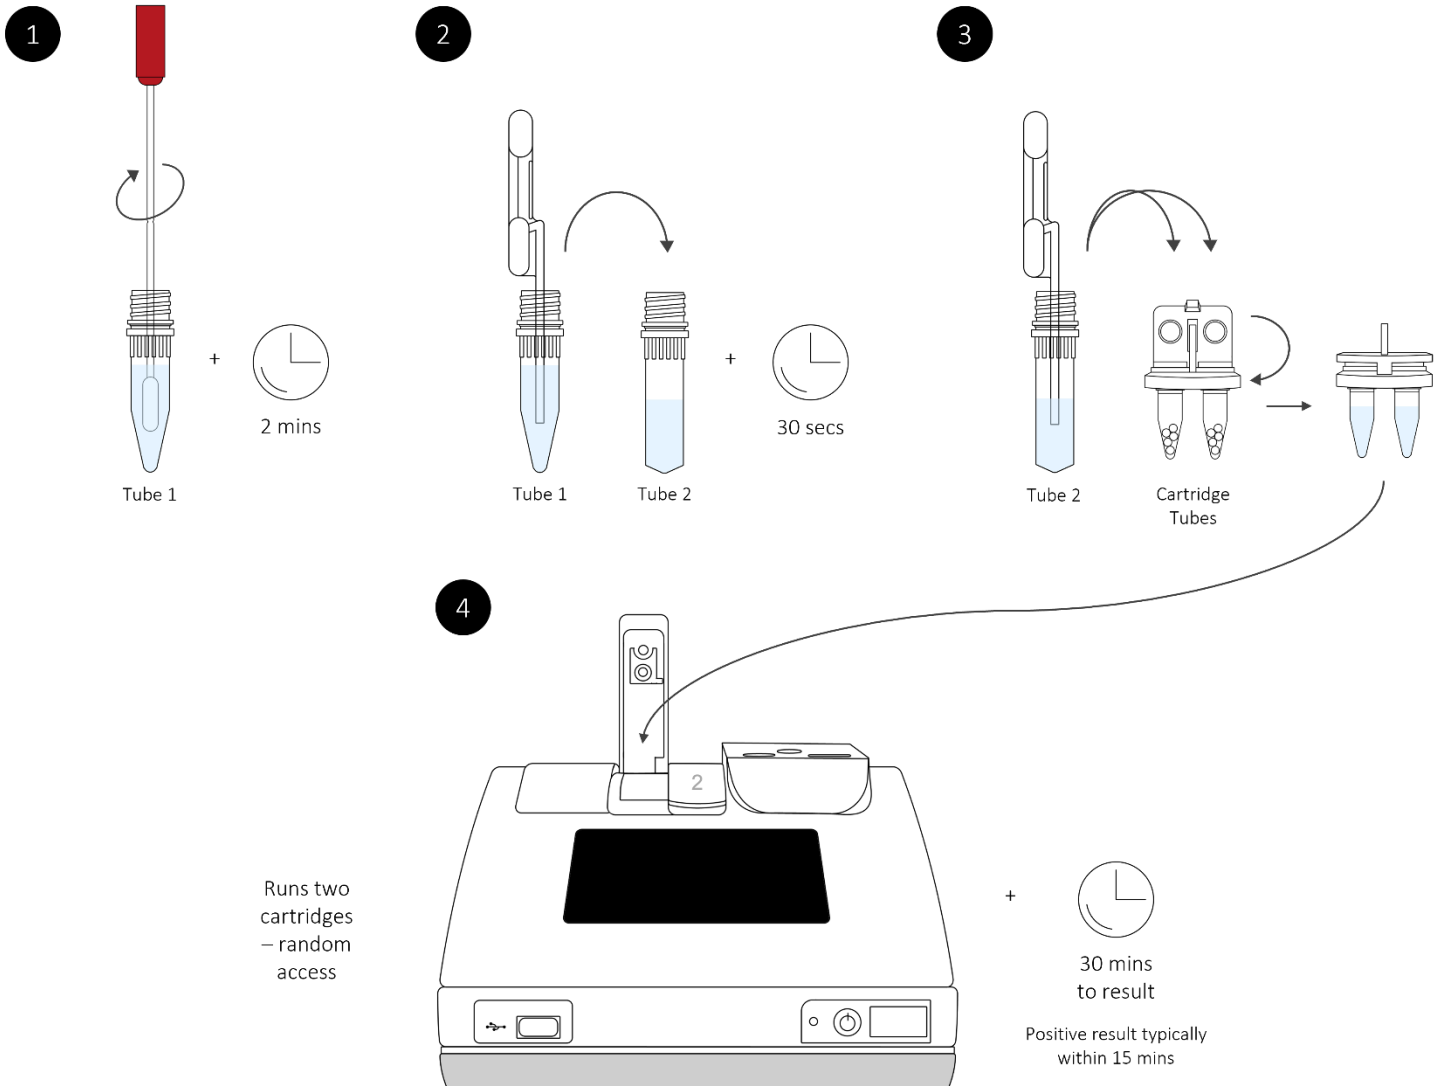

Use with ZiP-P2 Instrument

ZiP-CoVx-P2 is designed to be used with the portable ZiP-P2 instrument.

- Deployable at point-of-care settings
- Decentralised diagnoses
- Integrated sample preparation
- Screen-prompted workflow with automated result interpretation and reporting
- Minimal training required
- Secure, encrypted data

Simple Workflow

NOTE:

Approved for clinical use in the EU (CE-mark).

Research Use Only, in other regions.

Always follow in the instructions for use.
